DR Coffee F100 Series

F100 series fully auto commercial coffee machine is suitable for commercial catering scenarios and office scenarios, there are up to six options based on the specific application requirements (Powder/Fresh milk/ Water tank inlet),. It used new generation of grinder group, equipped with a dual boiler system to make the great improvements on the production stability and efficiency.

Stable and durable

The grinding components of this model have been fully upgraded, which can make the wear smaller, longer life, and can maintain a more stable grinding coefficient to ensure the quality of coffee production.

High Efficiency

Equipped with one hot water boiler and one steam boiler, coffee and high temperature milk foam can be made at the same time, provide more efficient coffee, more stable product quality.

Brilliant Big Screen

All versions are equipped with a 10.1 inch touch large screen, loading the IPS retinal full fit technology and AF anti-fingerprint technology. The perspective is wider, the picture quality is higher, and the touch is more smooth.

Smart and convenient

With fresh milk function are equipped milk lack monitoring function, when the milk box is short of milk, the user can be reminded to add in time.

Feature

- Independent hot water outlet •
- Quick remove metal brewer •
- Coffee milk out same time •
- Coffee cold water out same time •
- 6L Big water tank •
- Bottled water self-absorption •
- Tap water supply •
- Intelligent fully automatic cleaning •
- IOT System E-Paymnet ○

Specifications

- Bean hopper capacity (g) 1200
- Powder hopper capacity (L) 1.8*2
- Grounds box capacity (pcs) 70pcs/10g
- Display size (Lateral) 10.1"
- Rated voltage (V) 220-240
- Frequency (Hz) 50/60
- Power (W) 2700-3100
- Weight (kg) 24-30
- Included water tank Size (cm) 40.5*54*66

Capacity

- Advised daily output (cup) 200
- Hourly output 50ml Espresso (cup) 100
- Hourly output 200ml Espresso (cup) 80
